

### 30 Clicks: Information Tools at Your Fingertips

**What is 30 Clicks?** Weekly 30 minute sessions, sponsored by the Cannell Library to:

- explore new technologies,
- learn about information tools, and
- network with other interested Clarkers.

**Who:** Everyone is welcome (Clark faculty, students and staff)

**When:** Wednesdays, 12:15-12:45pm (Room open and hosted 12-1pm)

**Where:** Cannell Library, LIB 103 (You are welcome to bring your lunch.)

**Chocolate?** Of course, we'll have some.

### Winter 2012 Schedule

Date	Presenter	Topic	Description
Week 2: Jan. 18	Radka Ballada	Smarter Measure	Do you have students struggling to manage files or having difficulty formatting and submitting papers electronically? How tech savvy are your students? The <b>SmarterMeasure Learning Readiness Indicator</b> identifies levels of student readiness for both online and face-to-face courses by testing and providing feedback about technical readiness, academic success skills, learning styles, reading rates, typing speed and more. Learn how this tool can help you and your students.
Week 3: Jan. 25	Lori Wamsley	Prezi	Tired of PowerPoint presentations? Prezi is a free online tool which will help you create fun, visually interesting presentations. Learn how to easily add text, images, videos, Word documents, and .pdfs to your Prezi presentation. If you like mind maps and conceptual thinking, you'll love Prezi!
Week 4: Feb. 1	Kim Read	Free & Cheap Mobile Apps for Food and Fitness	Did you make a New Year's Resolution to get fit and healthy? Let your smart phone help! We'll look at an app that trains you for a 5k even if you've never been a runner before, an app that helps you choose wisely at the grocery store, apps for yoga, even an app that tells you how long you need to exercise to work off that six pack you drank watching the Trailblazers game. Android and iPhone friendly.

Week 5: Feb. 8	Julie Austad and Amanda Brown	Facebook vs. Google+	For the past few years, Facebook has been the leading social network for the world. In the summer of 2011 a new challenger arose. Google+ is a developing social network from Google with many new features. Will it be able to gain enough support to succeed and overthrow the current champion? Come and watch as these two social networks go head to head and you decide which is superior.
Week 6: Feb. 15	Erika Nava	Tegrity	Whether teaching online, face to face, or both, come learn about how Tegrity can help enhance student learning. This program allows you to record class sessions, make tutorial videos of difficult concepts and even allows your students to make recordings. It is very easy to use. Please join instructor, Erika Nava, for a discussion of how Tegrity is being used in her classes.
Week 7: Feb. 22	Lorelle VanFossen	Your Blog as Your Business Card	Facebook, Google+, Twitter, blogs, Tumblr, email, home phone, work phone, cell phone...how many ways are there for people to contact you? Learn how to spread your social web wide and bring them all back home to you - your central address on the web. We'll talk about your online identity, privacy, creating a contact page, and how to write an About page that makes people want to get to know you and work with you. Isn't it time you had one place to call home on the web?
Week 8: Feb. 29	Robert Hughes	Reviving the Lost Art of Browsing in the new Web Era	Google and new search engines are becoming more accurate and delivering more specific and targeted results than ever before. But what about when your intentions are not so specific? CTEC instructor Robert Hughes believes that some of the most valuable web interactions are gained through browsing subject directories, RSS feeds and customized web and social media aggregators. Come to this session to learn how "search" is killing serendipity how it could benefit you to truly browse more within your web browser.
Week 9: March 7	Wendy Clark	Photoshop Functionality for Free	Adobe Photoshop is the professional standard for creating photo images, but it costs over \$700 for the average user. Many of its powerful features are available in other graphics programs online for free. This workshop will briefly compare some of Photoshop's advanced features—making selections, adding layers, retouching—with several leading free alternatives. No Photoshop experience necessary! A list including favorite (free!) basic editors will be available at the end.
Week 10: March 14	Roxanne Dimyan	Google Grab Bag	Did you ever wonder what's lurking in Google's "More" option? Guess what? There's "Even More"! We'll grab a few for exploration: Google Images (search for images on the web), Google Earth and Google Books (search full text of books). Maybe you'll even be asking for "more"!
